# **1. Introduction**

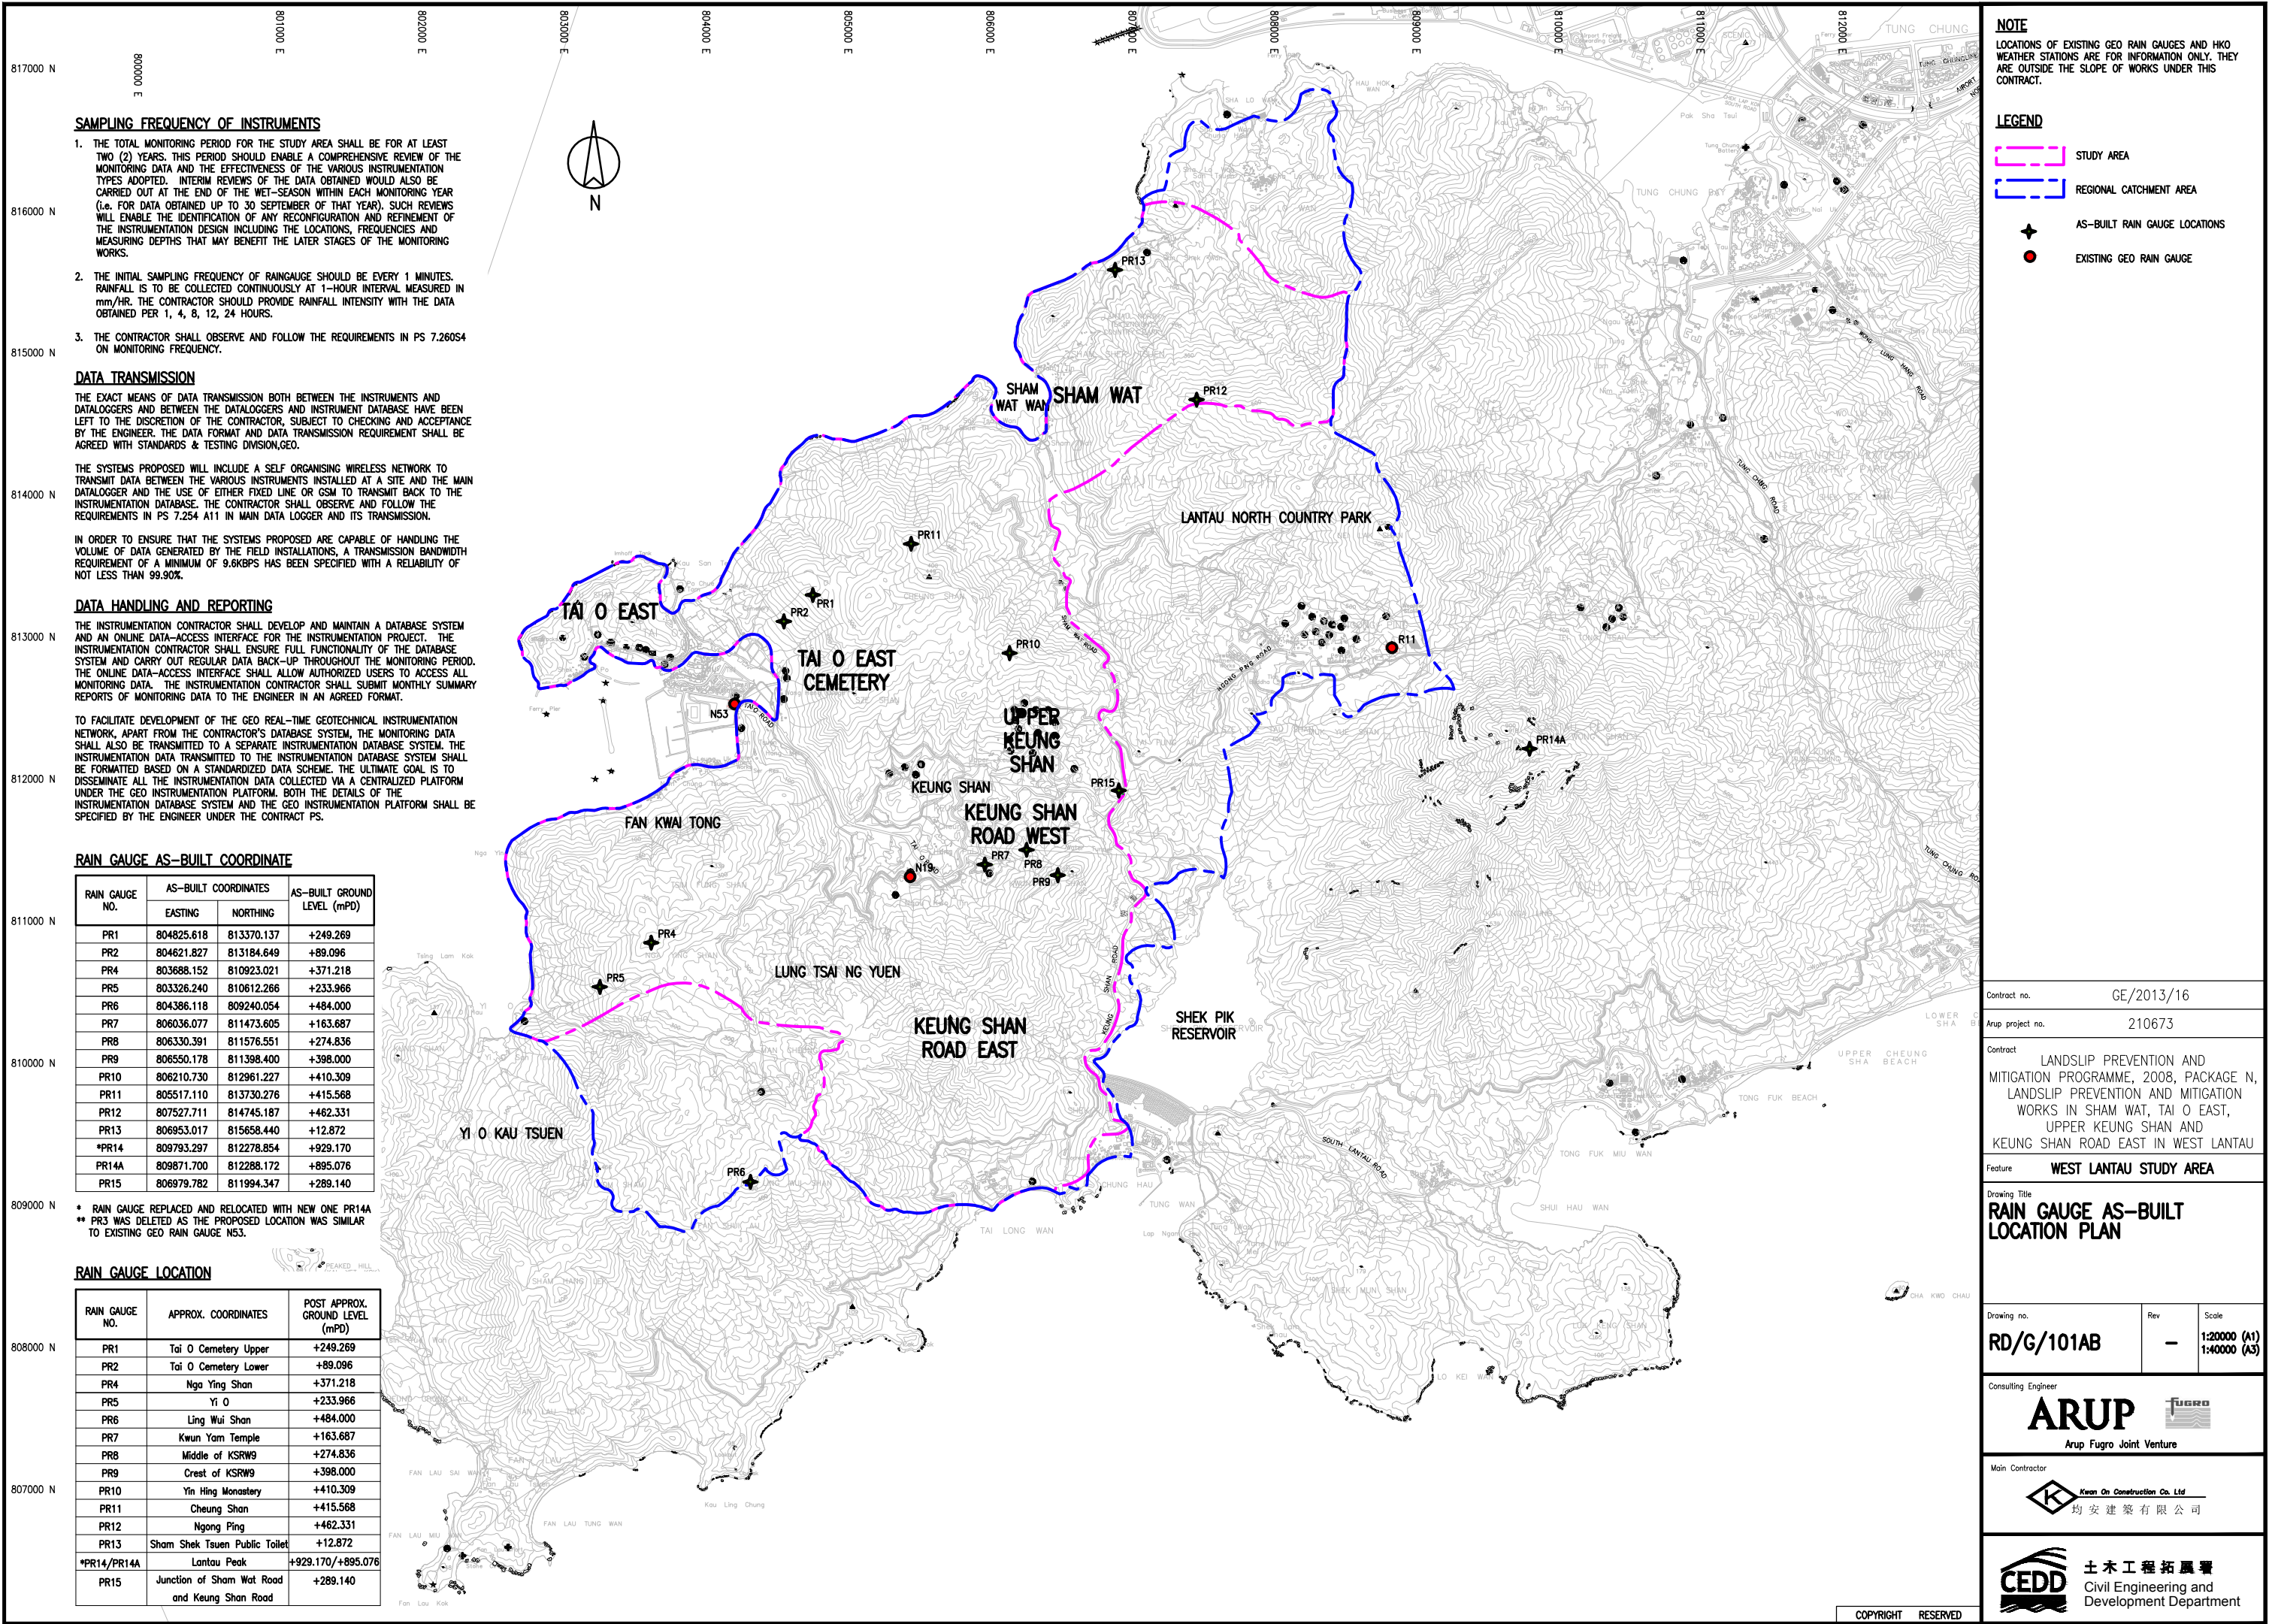

# Introduction

Geotechnical instruments were installed by the specialist subcontractor UTop of Kwan On Construction Co. Ltd. at west Lantau Island as part of the scope of works committed under CEDD GEO Contract No: GE/2013/16. The Consultant and Engineer for the project is Arup Fugro joint Venture (AFJV). The installation of the specialised instrumentation was undertaken in three areas of Lantau - Tai O cemetery, Keung Shan Road West and West Lantau. Due to the diverse nature of the monitoring data required in the contract, instruments to measure data of activities both above and below ground were installed. Data monitoring began in late 2015/early 2016 with the exception of the raingauges which began monitoring in May 2015.

This report presents our geotechnical instrumentation monitoring data summary for the Raingauge at West Lantau in December 2015.
